PROFESSIONAL SUMMARY

Power Platform Developer with 1 year of hands-on experience, including a 3-month internship, designing and delivering end-to-end business solutions on the Microsoft Power Platform. Proficient in Canvas Apps, Model-Driven Apps, Power Automate, Power BI, and Dataverse. Skilled in automating complex approval and business workflows, building secure Dataverse data models, and integrating third-party REST APIs through custom connectors to deliver measurable improvements in operational efficiency.

WORK EXPERIENCE

Power Platform Developer
GreenX Consultants — Jan 2026

- Designed and delivered Canvas and Model-Driven Apps, reducing manual effort by ~40%.
- Built a Leave Management System with multi-level approval flows and Teams/Outlook notifications.
- Automated business processes using Cloud and Scheduled Flows in Power Automate.
- Managed Dataverse tables, relationships, security roles, and Business Process Flows.
- Developed Power BI dashboards and integrated third-party REST APIs via custom connectors.

Power Platform Developer Intern
Numrex — 3 Months (Internship)

- Completed a 3-month internship building Canvas Apps and Power Automate flows on Dataverse.
- Assisted in developing and testing apps and automated workflows under senior guidance.

EDUCATION

Bachelor of Computer Science
Virtual University of Pakistan — Jan 2026

TECHNICAL SKILLS

Power Platform: Canvas Apps, Model-Driven Apps, Power Automate (Cloud, Scheduled, Instant Flows), Power BI, Power Pages
Dataverse & Data: Dataverse, Security Roles, Business Rules, Business Process Flows, Plugins
Power Fx & Dev: Patch, Filter, LookUp, ClearCollect, ForAll, Concurrent, SubmitForm, Navigate, Defaults()
Languages & Tools: C#, JavaScript, SQL, REST APIs, Custom Connectors

PROJECTS

Leave Management System | Canvas App, Power Automate, Dataverse

- Built a full-featured leave management app enabling employees to apply for, track, and manage leave through a Canvas App backed by Dataverse.
- Designed multi-step approval flows with manager and HR notifications via Teams and Outlook; business rules enforce leave balance validation.

Sales Pipeline Management & Reporting | Model-Driven App, Power BI, Dataverse

- Customized Model-Driven App forms, views, and dashboards for client sales pipeline management and customer relationship tracking.
- Delivered Power BI dashboards integrated with Dataverse, providing real-time sales KPIs and operational reports to leadership teams.

Workflow Automation Suite | Power Automate, SharePoint, Teams

- Automated document generation and multi-step approval workflows using Power Automate with SharePoint as the document library backend.
- Integrated Microsoft Teams notifications and Outlook email triggers, keeping all stakeholders updated at every workflow stage.
